

JAYSREE B

AI Engineer

Bangalore, India | jaysreebalu22@gmail.com | 8296137658 | [LinkedIn](#)

PROFILE SUMMARY

AI Engineer with a strong full-stack engineering foundation, transitioning into applied AI after five years across enterprise integration (EDI) and front-end development (Angular). Currently building production GenAI applications, including a document-grounded conversational assistant using RAG pipelines, Azure AI Search, and LLM orchestration. Cloud- and AI-certified across AWS and Microsoft Azure, with a consistent track record of building production-grade applications end to end and adapting quickly across technology shifts.

WORK EXPERIENCE

AI Engineer

Tata Consultancy Services (TCS)

Apr 2026 – Present

United Kingdom

- Transitioned from front-end engineering into AI Engineering, building production-grade GenAI applications using Python and FastAPI.
- Built a document-grounded conversational assistant for customer support and customer care: documents are ingested and chunked, embedded into Azure AI Search, and retrieved at query time to ground LLM responses (RAG architecture).
- Implemented conversation history persistence using Azure Cosmos DB to maintain context across multi-turn customer interactions.
- Designed the retrieval-augmented generation flow end to end — chunking strategy, vector indexing, retrieval, prompt construction, and LLM response generation.
- Building hands-on depth in large language models (LLMs), RAG pipelines, and Python-based API development as part of a self-directed and team-supported upskilling track.

UI Developer (Angular)

Tata Consultancy Services (TCS)

Nov 2022 – Mar 2026

India (2022–2025) → United Kingdom (2025–2026)

- Built an insurance domain web application from the ground up using Angular, owning the front-end architecture end to end.
- Implemented authentication and authorization flows, route guards, and secure session handling.
- Designed and implemented application-wide state management to support complex, data-heavy insurance workflows.
- Developed reusable, modular components and services following Angular best practices (RxJS, dependency injection, lazy-loaded modules).
- Wrote and maintained unit tests (Jasmine/Karma) to ensure code quality and reliability across releases.
- Collaborated directly with insurance client stakeholders to translate business requirements into functional, performant UI features.
- Relocated to the UK in 2025 and continued in the same role with increased ownership and client exposure.

Programmer Analyst – EDI Analyst

Cognizant

Nov 2020 – Nov 2022

Bangalore, India

- Delivered EDI implementation and post-production support for logistics management, covering end-to-end Trading Partner setup and testing for EDI X12 transactions (204, 990, 214, 210, 997).
- Monitored production systems for inbound/outbound transmission failures and translation errors, and resolved issues across FTP, SFTP, and AS2 protocols to maintain SLA compliance.
- Partnered directly with clients on issue resolution and Trading Partner onboarding.

KEY PROJECTS

Customer Support Conversational Assistant (RAG)

- End-to-end GenAI assistant: document upload → chunking → embedding into Azure AI Search → retrieval-augmented LLM response generation, with conversation history in Azure Cosmos DB.

Insurance Policy Management UI (Angular)

- Full front-end build for an insurance client covering authentication, state management, modular components, and unit-tested business workflows.

TECHNICAL SKILLS

AI / ML: Python, FastAPI, LLMs, OpenAI, RAG (Retrieval-Augmented Generation), Azure AI Search, Prompt Engineering

Cloud & DevOps: Azure Cosmos DB, Azure AI Search, AWS, Docker, Kubernetes, CI/CD

Front-End: Angular, JavaScript, TypeScript, RxJS, HTML, CSS, Unit Testing (Jasmine/Karma)

Languages & Core: Python, JavaScript, Core Java, SQL, XML

Integration / EDI: EDI X12, EDI Implementation, Partner Setup, FTP/SFTP/AS2, Cleo Clarify, Cleo Harmony

Tools: Git, GitHub Copilot, Putty, PagerDuty, Microsoft Excel

CERTIFICATIONS

AWS Certified Cloud Practitioner	<i>Amazon Web Services</i>
Microsoft Certified: Azure AI Fundamentals	<i>Microsoft</i>
Microsoft Certified: Azure Fundamentals	<i>Microsoft</i>
GitHub Copilot Certification	<i>GitHub</i>
Azure AI Apps and Agents Developer Associate	<i>Microsoft</i>

EDUCATION

B.E., Electronics and Communication Engineering	2016 – 2020
<i>Atria Institute of Technology</i>	<i>Bangalore, India</i>
